

SUMMARY

Full-stack developer who has shipped real web and mobile products end to end since 2024 — React and React Native frontends, Node/Express and Supabase backends, and live Shopify and business websites. Comfortable owning a feature from data model to deployment, with CI and tests in place. Open to junior and entry-level full-stack roles (remote).

SKILLS

FRONTEND React, React Native, Expo, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite, Next.js, responsive UI	BACKEND AND DATA Node.js, Express, REST APIs, Supabase, PostgreSQL, RLS policies, Zod validation, serverless functions
WEBSITES AND COMMERCE Shopify, Liquid, Shopify Admin GraphQL, product catalogs, collection pages, structured data, local SEO	DELIVERY Git, GitHub, GitHub Actions CI, Netlify, Render, EAS builds, Vitest, Node test runner, sitemap and robots setup

EXPERIENCE

Freelance & Independent Full-Stack Developer

REMOTE · 2024–PRESENT

- Built and delivered a client website for Luxury Solutions, a Hamilton-area exterior-cleaning business — responsive service pages, a quote-request flow, testimonials, local SEO, and deployment.
- Independently designed, built, and shipped four full-stack products end to end — Daily 60, FinTrack, Kakebo Shop, and Wilde Digital (detailed below) — owning the UI, API, data model, and deployment for each.
- Set up CI, automated tests, and deploy pipelines across the stack (GitHub Actions, Vitest, Netlify, Render, EAS) so each project ships clean and stays reproducible.

SELECTED PROJECTS

Daily 60

MOBILE APP · AI BACKEND

Expo goal-planning app that turns one goal into a weekly plan with daily actions, reminders, reflections, and streak tracking.

- Built the Expo app (Router, React Native, Zustand, MMKV, notifications, haptics, EAS) and packaged it for Android closed testing with Play Store metadata.
- Kept the Claude API key server-side behind an Express/TypeScript API with Zod validation, quota checks, and fallbacks; GitHub Actions CI runs typecheck and tests on both services.

FinTrack

FINANCE DASHBOARD

Finance dashboard for service businesses to review transactions, budgets, recurring costs, and reports.

- Built dashboard, cash-flow, review, tax-prep, and report views over a 7-table Supabase schema with 9 row-level-security policies isolating each business's data.
- Added CSV import with duplicate detection, column mapping, vendor-category memory, and a review workflow; ships a one-click public demo backed by six months of seeded data.

Kakebo Shop

SHOPIFY STOREFRONT

Live Shopify storefront for anime figures, Tokusatsu items, wall art, apparel, blind boxes, plush, and collectibles.

- Updated Liquid sections, snippets, collection templates, navigation, product presentation, and storefront QA.
- Improved catalog discovery with collection structure, FAQ schema, visible SEO content, internal links, and Shopify Admin GraphQL scripts.

Wilde Digital

LEAD-GEN WEBSITE

Static service website with project pages, service pages, an ROI calculator, lead forms, mini CRM behavior, and Netlify deployment setup.

- Built the public site with HTML, CSS, JavaScript, structured data, sitemap and robots files, and Netlify configuration.
- Added ROI calculator logic, lead qualification, CRM status tracking, CSV export, local persistence, and fallback email flows.

Luxury Solutions

LOCAL SERVICE SITE · CLIENT

Local service website for a Hamilton-area exterior cleaning business focused on quote requests, trust signals, and local SEO.

- Built responsive pages for window cleaning, pressure washing, gutter cleaning, soft washing, deck/fence cleaning, commercial services, and service-area pages.
- Added calls to action, contact paths, testimonials, recent work sections, sitemap and robots files, and deployment scripts.

ADDITIONAL PROJECTS

Chatter: React/Vite and Capacitor app with an Express/OpenAI backend for coaching, local speech capture, haptics, and transcript handling.

Chatter Mobile: Expo React Native prototype for call coaching, tablet/mobile/web layouts, speech output, and negotiation guidance.

Habit Tracker: Next.js and Supabase habit tracker with RLS, anonymous/email identity, owner-key isolation, drag-and-drop ordering, charts, and Stripe integration.

Maze Generator: Single-file Three.js browser game with procedural maze generation, top-down preview, first-person controls, collision handling, and BFS enemy pathfinding.

EDUCATION

freeCodeCamp — Full-stack web development certification track, 2024
