

SUMMARY

Full-stack developer working across React, React Native, Expo, Node/Express, Shopify, Supabase, and static business websites. I build practical apps and websites with clear flows, working data handling, deployment setup, and enough testing or review to hand off without extra cleanup.

SKILLS

FRONTEND

React, React Native, Expo, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite, Next.js, responsive UI

WEBSITES AND COMMERCE

Shopify, Liquid, Shopify Admin GraphQL, product catalogs, collection pages, structured data, local SEO

BACKEND AND DATA

Node.js, Express, REST APIs, Supabase, PostgreSQL, RLS policies, Zod validation, serverless functions

DELIVERY

Git, GitHub, GitHub Actions CI, Netlify, Render, EAS builds, Vitest, Node test runner, sitemap and robots setup

SELECTED WORK

Daily 60

MOBILE APP · AI BACKEND

Expo goal-planning app that turns one goal into a weekly plan with daily actions, reminders, reflections, and streak tracking.

- Built the mobile app with Expo Router, React Native, Zustand, MMKV persistence, local notifications, haptics, and EAS build profiles.
- Kept the AI provider key and prompt handling on the backend with JSON extraction, Zod validation, quota checks, and fallback responses.

FinTrack

FINANCE DASHBOARD

Finance dashboard for service businesses to review transactions, budgets, recurring costs, and reports.

- Built dashboard views for revenue, expenses, profit, category spend, budget progress, recurring overhead, and cash flow trends.
- Added CSV import with duplicate checks, column mapping, vendor memory, review workflows, accountant export, and Supabase Auth plus RLS.

Takebo Shop

SHOPIFY STOREFRONT

Live Shopify storefront for anime figures, Tokusatsu items, wall art, apparel, blind boxes, plush, and collectibles.

- Updated Liquid sections, snippets, collection templates, navigation, product presentation, and storefront QA.
- Improved catalog discovery with collection structure, FAQ schema, visible SEO content, internal links, and Shopify Admin GraphQL scripts.

Wilde Digital

LEAD-GEN WEBSITE

Static service website with project pages, service pages, an ROI calculator, lead forms, mini CRM behavior, and Netlify deployment setup.

- Built the public site with HTML, CSS, JavaScript, structured data, sitemap and robots files, and Netlify configuration.
- Added ROI calculator logic, lead qualification, CRM status tracking, CSV export, local persistence, and fallback email flows.

Luxury Solutions

LOCAL SERVICE SITE

Local service website for a Hamilton-area exterior cleaning business focused on quote requests, trust signals, and local SEO.

- Built responsive pages for window cleaning, pressure washing, gutter cleaning, soft washing, deck/fence cleaning, commercial services, and service-area pages.
- Added calls to action, contact paths, testimonials, recent work sections, sitemap and robots files, and deployment scripts.

ADDITIONAL PROJECTS

Chatter: React/Vite and Capacitor app with an Express/OpenAI backend for coaching, local speech capture, haptics, and transcript handling.

Habit Tracker: Next.js and Supabase habit tracker with RLS, anonymous/email identity, owner-key isolation, drag-and-drop ordering, charts, and Stripe integration.

Maze Generator: Single-file Three.js browser game with procedural maze generation, top-down preview, first-person controls, collision handling, and BFS enemy pathfinding.

Chatter Mobile: Expo React Native prototype for call coaching, tablet/mobile/web layouts, speech output, and negotiation guidance.

Daily 60 Base44 PWA: React/Vite habit product with Base44 auth/database/functions, Claude integration, Stripe premium purchase flow, notifications, Resend email, and achievements.

Volume Booster: Native Android project using Kotlin, Gradle, AndroidX, AppCompat, Material components, and packaged app configuration.
